AUSTRALIAN MUSEUM

Manager Collections Database – Australian Museum Research Institute

Salary Classification: Clerk Grade 5/6 ($87,493 - $96,540) with a total remuneration package up to $107,497 per annum

Employment Status: Temporary, 4 days per week

Engagement period: immediate start until 30 September 2022.

About the Australian Museum

The Australian Museum (AM) operates within the NSW Department of Premier and Cabinet, is the first museum in Australia and was founded in 1827. The AM provides access, engagement and scientific research to increase our understanding of natural history and culture, particularly of the Australasian region. The AM holds more than 21 million objects of biological, geological and cultural collections and develops programs, exhibitions and school and community education initiatives onsite, online and offsite.
The new AM mission is: *To ignite wonder, inspire debate and drive change.*
The new AM vision is: *To be a leading voice for the richness of life, the Earth and culture in Australia and the Pacific. We commit to transform the conversation around climate change, the environment and wildlife conservation; be a strong advocate for First Nations' culture; and continue to develop world-leading science, collections, exhibitions and education programs.*

For more information, visit the website.

The AM supports a diverse workforce and promotes applications from First Nation and Torres Strait Islander people. People with disabilities who meet the selection criteria are encouraged to apply; and where required, Australian Museum will implement reasonable adjustment consistent with industry standard.

About the Role

We are seeking to backfill the role of Manager Collections Database (EMu) in a Temporary capacity 4 days per week until 30 September 2022.

The Database Manager is responsible for the technical management of the digital collection management system, ensuring it integrates with AM IT and Digital infrastructure, and oversees data standards for data capture, storage and access to achieve project

outcomes and support the achievement of Australian Museum objectives.

The role is critical for AMRI as the EMu database is the backbone of Collection Management with all aspects of Collection Management depending on the database. EMu is critical to the Collection Enhancement Project, asset management and collection valuation which are increasingly important.

The role is required to oversee ongoing system updates, the establishment of a new on-line web-based search tool, support for Sapphire (the web based EMu plug in for rapid data entry, etc), and for replacing/developing EMu reports using Crystal. The AM is currently undertaking development of an Online Collections Access portal which requires significant input from this role to maintain the interface between Fotoware, EMu and the new IMu system.

Essential Requirements

- Tertiary degree or equivalent experience in information technology or relevant discipline
- Demonstrated advanced skills, experience and expertise in database manipulation and management preferably in a Museum or natural history context.
- Demonstrated experience in managing a database environment including databasing and data import, data reporting and access, and creating and implementing data standards.
- Demonstrated experience with managing large datasets preferably of a taxonomic and/or ecological nature.

Knowledge & Experience

- Expert knowledge and extensive experience in the administration and technical maintenance of EMu, and use of IMu, Axiell Sapphire, Crystal reports and awareness of Linux and Fotoware.
- Expert knowledge and extensive experience in developing, maintaining and modifying multi-disciplinary museum collection management databases for collection management, including audit and valuation, exhibition and conservation related processes and online products.
- Highly developed problem-solving and analytical skills and proven experience in responding to problems experienced by business system users.
- Proven ability to prepare technical specifications and user documentation.
- Demonstrated ability to work in a team and to work collaboratively.
- Excellent interpersonal and communication skills.

For more information please download the documents Role Description and Applying for a role in the NSW Public Service.

Applicants must submit:

1. A one to two page covering letter which addresses the role description's **essential requirements** and your relevant experience
2. Resume

As part of the online application process you will be prompted to answer two targeted questions.

1. Please give an example of a relevant and challenging project that you worked on that required innovative thinking in areas such as sustainability and cost efficiency. What did you do, how did you do it and what was the outcome? (500 words maximum)
2. Please outline the things you would need to consider, including the risks, when commencing maintenance work on museum collections and equipment within a public space. How would you adapt your working practice to reflect these requirements? (500 words maximum)

Enquiries: Penny Berents, Manager, Life Science email penny.berents@australian.museum

The Australian Museum welcomes applications from First Nation and Torres Strait Islander people, people from diverse cultural backgrounds and people with disability. Please indicate if you have any accessibility requirements in your application or speak with the contact person should you be called for an interview. We provide reasonable adjustment for people with a disability during the recruitment process and on employment.
