Invertebrate/Vertebrate Zoology Collection Technician ()

Entomology Collections Manager ()

Entomology Collections Manager

The Entomology Collections Manager maintains overall responsibility of The J. Linsley Gressitt Center for Research in Entomology collections including administering the care and maintenance of these specimens and associated records in the Entomology Department. The Collections Manager supervises collections staff activities and manages activities associated with collections use to provide access.

Duties and Responsibilities

- Supervises and participates in the identification, recording, and organization of the collections per departmental and disciplinary standards to enhance access and retrieval of materials for study and exhibition.
- Process specimens for preservation and storage using appropriate methods and techniques to provide for their optimum use in study and display.
- Updates and maintains the collections database and other retrieval systems to enhance access to and use of the collections and associated information. Hosts visiting researchers working in the collections and arranges equipment, workspace, and building access. Responds to inquiries to provide accurate and appropriate information.
- Plans, arranges, and maintains storage systems, monitors and controls environmental conditions, conducts and supervises monthly IPM monitoring and intervention for pests, and appropriately secures the collections to ensure the physical welfare of the collections and associated records.
- Supervises and participates in the processing of transactions to ensure that additions to and deletions from the collections are in accordance with Museum and department policies and procedures. Works with federal and state agencies to

ensure compliance with all collecting, possessing, and shipping regulations and permits. Receives and reviews collections offered by potential donors.
- Supervises and coordinates the training and work of collections staff, volunteers, and interns and encourages their professional development to manage the collections efficiently and effectively.
- Develops and writes grant proposals to support proper care, processing, and access associated with the collections.
- Provides guided tours and explanations to public groups to demonstrate the collections' care and use, and to inform the public of Museum resources.
- Participation in education and public programs, off and on-site outreach programs, provide content for exhibits and participate in fundraising events.
- May entail participation in fieldwork for surveying, sampling, collecting, and general research activities; publishing papers relating to collections management or scientific discipline; and attending and presenting at professional meetings and seminars relating to the collections, data management, and other collection-based projects.

Qualifications

- Master's degree in biology or related field, or 5+ years of experience working in collections.
- Knowledge of insect taxonomy and world geography, specifically the Pacific Basin.
- Excellent interpersonal and organizational skills; ability to work effectively as part of a team.
- Working knowledge of computers, desktop, and electronic publishing and modern digital imaging skills and database management.

Other Requirements

- Professional and appropriate dress for the job at hand (office, laboratory, field)
- Good Attendance
- Detail-oriented
- Flexibility in schedule to meet deadlines

Direct Reports

- Entomology Collections Technicians
- Entomology Digitization Technicians

Working Conditions

Laboratory work environment may involve exposure to fumes, noxious odors, and gases from the mounting and preservation media, as well as dust and mold from the specimens themselves. Fieldwork may involve exposure to high altitudes and wet conditions.

Physical Requirements

Primarily light work with periods of sitting, walking, reaching, lifting, carrying, pushing, pulling. A high degree of hand-eye coordination is required in using a microscope, hand tools, and light power tools to mount and prepare specimens that range in size from small and delicate to very large and heavy. Long periods of handling and manipulating specimens and storage containers. Long periods of data entry and keyboard use. Visual requirements include 20/20 corrected vision, depth perception, a wide field of vision, and the ability to distinguish colors. Must be able to lift at most 25 lbs. Must be able to communicate verbally with co-workers and others, both in-person and over the phone. Must be able to read and process information, as well as communicate in writing.

Hours: Full-Time Salary, some evenings and weekends required
Salary: Commensurate with experience
Deadline to apply: The application will remain open until the position is filled.
