The **Royal BC Museum** sits on the Traditional Territory of the Lekwungen (Songhees) and Xwsepsum (Esquimalt) Peoples. The museum and archives explore the province's human history and natural history, advances new knowledge and understanding of BC, and provides a dynamic forum for discussion and a place for reflection. The Royal BC Museum celebrates culture and history, telling the stories of BC in ways that enlighten, stimulate and inspire. The museum is a hub of community connections in BC.

We are committed to creating a diverse workplace where everyone is celebrated.

As an inclusive and accessible employer please advise Human Resources if any accommodations are required to assist you to ensure equitable participation in this hiring process.

ROYAL BC MUSEUM

CAREER OPPORTUNITY

Information Systems Analyst

Salary: $53857 per annum starting, increasing to $61,097

Royal BC Museum, Victoria, British Columbia

The Royal British Columbia Museum is one of Canada's great cultural treasures. Our collections, research, presentations and programs enable us to tell the stories of BC in ways that enlighten, stimulate and inspire.

Under the general guidance of, and in consultation with the Digital Manager, the incumbent will manage development and maintenance of Royal BC Museum database systems including but not limited to the following: a museum and archives collection management system, an integrated library system, and a digital asset management system. As well, this position will help develop a collection location system. This position manages technical projects within the museum and archives, including liaising with contractors and partners. This position also works closely with users, creating and implementing training programs for the systems identified above.

Along with formal education in computer sciences or library sciences you possess strong skills as a data analyst for large complex systems. You have database administration experience and are comfortable querying large datasets using SQL for the purpose of identifying patterns of data corruption, performing bulk updates, or writing custom reports. As well, you are comfortable with project administration, working with users and implementing training programs. Ideally you will have work experience directly related to museum, library and/or archive collections, with knowledge of associated data standards and schemas. In addition to a data analyst skillset, you have proven experience managing complex projects along with developing procedures and standards. Your creativity, enthusiasm and confident nature enables you to succeed in a team environment while your results orientation and ability to demonstrate initiatives ensures the job gets done and organizational goals are met. You will possess a high degree of flexibility, and the ability to manage and refocus priorities.

We offer an attractive compensation package, which includes a competitive salary, excellent benefits, a fabulous location and the chance to work in an organization passionate about preserving, protecting and sharing the wonders of the human, natural and archival history of BC.

This position requires Criminal Records Checks under the BC Public Service Screening Policy and the Criminal Records Review Act and all applicants must be legally entitled to work in Canada (have Canadian citizenship or permanent resident status).

Please refer to the full job description and selection criteria to ensure your application addresses the areas we will be looking at when assessing suitability for this opportunity.

Please submit your application in pdf format by 11:59 pm (PST) April 15, 2019 quoting competition RB2019:04 via email to:
humanresources@royalbcmuseum.bc.ca

APPROVED BY:		PHONE NUMBER:	

ORGANIZATION OVERVIEW

The Royal BC Museum and Archives is one of Canada's great cultural treasures. Our collections, research and presentations enable us to tell the stories of BC in ways that enlighten, stimulate and inspire. By exploring our human history and natural history, the Royal BC Museum advances new knowledge and understanding of BC, and provides for a dynamic forum for discussion and a place for reflection.

We have more than 7 million objects and specimens and millions of significant government documents and records; substantial photographic, audio and video collections; artworks; and an extensive library of publications. Through research and learning, we strive to broaden understanding about our province and inspire curiosity and wonder. We are passionate about sharing British Columbia's story with the millions of visitors who walk through our doors, explore our website and engage with us on social media channels each year.

DEPARTMENT OVERVIEW

The Digital Unit provides online access to the museum and archives collections and research via a corporate website, public collections data search portals, social media properties web-based and on-site digital and related projects. This department also provides and advises on digital analytics.

PURPOSE OF POSITION

The Information Systems Analyst is responsible for the development and maintenance of Royal BC Museum database systems including but not limited to the following: museum and archives collection management systems, a digital asset management system, genealogy and library databases.

The Information Systems Analyst will ensure data integrity of collection records through extensive testing of data imports and reviews of data entry. As a part of maintenance, this position supports system users by coordinating break/fix issue management, training and user documentation.

As well, this position manages technical projects within the museum and archives, including liaising with contractors and partners.

SPECIFIC ACCOUNTABILITIES / DELIVERABLES

- Support the user base for all collection management systems through issue management, training and user documentation
- Manage development and maintenance of museum and archives collection management systems
- Acts as project manager for internal technology and digital projects throughout the initiation, planning, execution, control and close-out phases of the project management life-cycle. Involves recommending project scope, determining deliverables and quality assurance.
- Monitors and controls the status of multiple projects, key issues and schedules; takes corrective actions when required; ensures completion and/or completes quality assurance checks and post-implementation reviews.
- Troubleshoots application issues; identifies source of problems and determines possible work arounds; works with IT, vendor or contractors to design and implement fixes.
- Creates and loads metadata, administers data conversion processes, and maintains systems dictionaries with tables in consultation with internal and external references.
- Works closely with the museum and archives contracted IT services as well as contractors and vendors.
- Manages small teams of contractors for database and application development. Assigns work, reviews work for quality, and approves invoicing
- Tracks and reports expenditures for Collection Management System budgets up to $150,000 per annum.
- Manages the content, structure and display of museum and archive database information diffused online, and provides quality of assurance of published data.
- Develops technical standards and business processes for the organization, and leads the consultative process for their review and acceptance by all affected groups, ensuring the standards are complete and understandable.
- Develops and maintains documentation, standards to facilitate database implementation and operation.
- Develops and maintains training material and implements group and individual training sessions.
- Researches capabilities and impact of supporting new infrastructure software products and new features or versions of existing products, and performs risk and cost/benefit analysis.
- Implements plans and technical approaches necessary to accommodate database technology enhancements.
- Monitors performance, usage and throughput statistics
- Creates specialized reports and data sets.
- Plans, configures and tests new versions, patches and fixes, of database software, and assists with the migration of operational applications to the new environments.
- Ensures Royal BC Museum's data assets are protected from loss or unauthorized change; manages user profiles and access privileges to control and maintain user access and security.
- Represents the museum and archives on ministry committees and work groups to ensure technology solutions are identified, developed and achieved.
- Researches and stays current with recent developments in technology.

FINANCIAL RESPONSIBILITY

Responsibility to coordinate service contracts related to the IT and digital projects including tracking and reporting expenses for capital budgets of up to $150,000 with infrastructure projects. Signs for goods and services received.

DIRECT SUPERVISION (i.e., responsibility for signing the employee appraisal form)

SELECTION CRITERIA

Experience, Education and Training Requirements (Screening Criteria)

- Degree or diploma in a related field (e.g., computer sciences, library sciences) or an equivalent combination of education and experience.
- Proven experience managing complex projects. Experience using an agile development model considered a plus.
- Database administration experience
- Experience developing system user guides and procedures, standards, functional requirements, and other technical documentation
- Experience training system users on data entry and updates in collection management systems, and troubleshooting end-user issues.
- Prefer experience with collection management systems and/or digital asset management systems.

Essential Knowledge (Assessment Criteria)

- Knowledge of relational database systems, Structured Query Language and data management principles
- Knowledge of project management methodologies and lifecycles

Essential Skills and Abilities (Assessment Criteria)

- Proven ability to coordinate multiple projects within tight timeframes and set and manage deadlines
- Client service and support oriented
- Strong analytical and problem solving skills, flexible mindset
- Strong skills as a data analyst for large complex systems
- Strong oral and written communication skills
- Ability to work independently, often on own initiative
- Ability to identify patterns of data corruption, perform bulk updates, and written custom reports
- Ability to accurately report on and evaluate projects and tie work back to department and organization priorities
- High degree of flexibility and ability to manage and refocus priorities.

Behavioural Competencies (Assessment Criteria)

- **Planning, Organizing and Coordinating** involves proactively planning, establishing priorities and allocating resources. It is expressed by developing and implementing increasingly complex plans. It also involves monitoring and adjusting work to accomplish goals and deliver to the organization's mandate.
- **Initiative** involves identifying a problem, obstacle or opportunity and taking appropriate action to address current or future problems or opportunities. As such, initiative can be seen in the context of proactively doing things and not simply thinking about future actions.
- **Improving Operations** is the ability and motivation to apply one's knowledge and past experience for improving upon current modes of operation within the organization. This behaviour ranges from adapting widely used approaches to developing entirely new value-added solutions.
- **Teamwork & Cooperation** is the ability to work cooperatively within diverse teams, work groups and across the organization to achieve group and organizational goals.

Successful completion of security screening requirements of the BC Public Service, which may include a criminal records check, and/or Criminal Records Review Act (CRRA) check, and/or enhanced security screening checks as required by the Royal BC Museum (Note: It is important that you read the job posting carefully to understand the specific security screening requirements pertaining to the position).
